## Key:

Wheelchair Friendly

This type of equipment is designed to be regularly rearranged to different locations as needed.  
This equipment can be moved by adults or capable children under supervision.

Non-ground fixed - refers to items or structures that are not permanently attached or anchored to the ground. This equipment is not intended to be moved frequently but can still be relocated if required.

Get creative and add your own unique touch. These items can be customised to include text, logos, or personalisation of your choice at no extra cost.

## Critical Fall Height

Critical fall height is the maximum height of fall from play equipment to the ground. It is the distance from the ground up to the highest point a child is intended to reach or stand on.

## Minimum Space

The minimum space required for playground equipment refers to the area surrounding the equipment that needs to be left clear to ensure safety and functionality.

## Surfacing Required

The surfacing required is the amount of surfacing that has to be installed beneath and/or around equipment to ensure the safety of children in case of falls.

## Age Guide

Minimum age is a guide, children's capabilities will differ depending on size, fitness and ability so should always be supervised. Number of users is a guideline; children can differ in size and materials can deteriorate over time, the condition of equipment should be monitored, and children should always be supervised.

# St Giles School

We've had the pleasure of working with St Giles School on several projects, transforming their outdoor spaces into exciting, engaging areas for the children. From outdoor classrooms and play boats to playground markings, swings, and sports areas, each project has been a joy to create.

### Themed Roadways

Roadway themed spaces provide children with a safe, controlled environment to learn essential road safety skills, such as recognising traffic signs, crossing, and understanding basic traffic rules.

They encourage imaginative play, as children can pretend to be pedestrians, cyclists, or drivers, which enhances creativity and social interaction.

Roadways promote physical activity through walking, running, and biking while subtly teaching important life skills that improve awareness and safety in real-world settings.

# Sports & Fitness

## MUGA Surfacing

We install sports markings to suit your preferences, including combining markings for multi-use.

### Artificial Sports Grass

Popular Choice

Our 4G surface is an advanced artificial grass that requires no infill, is low maintenance, and has enhanced durability. Perfect for football.

### Multi-Play Grass

Versatile, artificial turf designed for various sports. Durable and low-maintenance. Perfect for running tracks.

### Personalisation

Popular Choice

Make your pitch unforgettable with a personalised centre-pitch logo that showcases your team's identity.

### 868 Rebound Mesh

Popular Choice

Heavy-duty twin wire mesh system. It comprises of two horizontal 8mm thick steel wires that encompass 6mm thick vertical wires to make up the mesh pattern. Plus additional wires for rebound.

### Junior Sports Mesh

Popular Choice

The mesh is made up of 5mm vertical steel wires which are then pressed between two 6mm horizontal wires that run parallel to each other.

### Short Mesh Fencing

Super durable material - good for areas of high vandal risk.

### Surface Coverings

Various paint coating options are available. Coatings are applied to surfaces like tarmac or concrete, enhancing grip and durability. Vibrant aesthetic + customisable markings for different sports.

### Tarmac Surface

New or existing tarmac. Smooth, low maintenance even surface for excellent ball bounce. Surface Covering can be added to protect tarmac.

### Polymeric Surface

Rubber-based material that offers excellent grip, shock absorption, and weather resistance.

### Timber Sports Fencing

Child friendly planed fencing constructed with planed and sanded, pressure treated timber.

### HDPE Fencing

UV stable fencing in a variety of coloured pales. Two tone options available - engraving can also be added.

### Kickboards

Kickboards are durable, treated timber boards installed around the base of MUGA fencing. They protect the fencing from impact, moisture, and wear at ground level.

## Groundwork and Drainage

### Installation into Existing Soil Areas

When installing a MUGA on an existing soil base, we install drainage to prevent surface water build-up and base works to provide a stable, durable, and level playing surface.

## Sports Netting

### Pitch Dividers and Netting

Take your MUGA to the next level with our pitch dividers and netting solutions. From racket sport nets to overhead systems that keep the ball in play - we've got you covered.

### Lighting and Access

We install a range of access solutions, including gates for MUGAs, pathway access, viewing benches, lighting, and more. Each installation is designed to provide safe, secure, and convenient access while complementing the overall layout of the facility.

## Creating a Quiet Space

By creating a quiet area in your playground, children who may feel overwhelmed by loud environments have a place to rest, recharge, and regulate their emotions. This is particularly beneficial for students with sensory sensitivities or those who experience anxiety.

A quiet zone encourages mindfulness and reflection through peaceful activities like reading or drawing, promoting emotional well-being and reducing conflicts. Offering a safe and inclusive space allows children to return to class more focused, improving their overall learning experience.

## Story Telling Area

Create an engaging and imaginative space where children can develop their listening and language skills in the playground.

Being outdoors stimulates creativity and encourages a deeper connection with nature, making stories more immersive and memorable.

This space also encourages social interaction, as children can participate in group storytelling, role-playing, and discussions, helping to build confidence and communication skills.
